EXPERIENCE

Sr. Applied Scientist
Amazon Web Services

2023 - Present
Seattle, WA

- Worked on implementation of a link-state routing protocol written in Rust
  * Implemented protocol state machines
  * Lead a team to adopt novel distributed system testing techniques (chaos and property-based testing)
- Delivered a "network compiler" – a core component of the AWS intent-driven network control plane

Applied Scientist
Amazon Web Services

2021 - 2023
Seattle, WA

- Designed and implemented a service that uses formal methods for proving correctness of network access control lists
- Contributed to the automated reasoning service that powers AWS Reachability Analyzer

Software Engineer
Intentionet

2017 - 2021
Seattle, WA

- Core developer of Batfish, an open-source network configuration analysis tool. Focus on routing protocols and control plane simulation
- Delivered multiple features in Batfish Enterprise, including an AWS-based cloud offering

Graduate Research Assistant
University of North Carolina at Chapel Hill

2011-2017
Chapel Hill, NC

- Researched global network optimization with applications to Software-Defined Networking (SDN)
  * Built a framework for expressing optimization components of different SDN applications
  * Developed workload distribution techniques for network intrusion detection systems
- Analyzed user behavior and computer infection data from a large enterprise

Research Internship
IBM Research

June-August 2015
Yorktown Heights, NY

- Built a tool for testing microservice applications using distributed fault injection and runtime assertions

Undergraduate Research Assistant
University of Minnesota Twin Cities

2009-2011
Minneapolis, MN

EDUCATION

Doctor of Philosophy in Computer Science
University of North Carolina at Chapel Hill

2017
Chapel Hill, NC

Focus in Software-Defined Networking, network optimization, and security

Master of Science in Computer Science
University of North Carolina at Chapel Hill

2013
Chapel Hill, NC

Focus in network security

Bachelor of Science in Computer Science
University of Minnesota Twin Cities

2011
Minneapolis, MN

Focus in computer security: privacy, anonymity, censorship resistance

National Science Foundation Graduate Research Fellowship

Lando Scholarship Merit-based scholarship awarded to outstanding computer science undergraduate students

Dean's List at University of Minnesota 3 semesters
